

# Falling Snowflake STEM Activity

## Instructions:

1. Color your snowflake
2. Cut out snowflake along dotted lines
3. Tape the straw vertically onto the back of the snowflake
4. String ribbon through the straw
5. Hold one end of the ribbon in each hand, lifting one arm higher than the other to make the snowflake "fall" by sliding down the ribbon

**Snowflake Template** (cut along the dotted lines):

## Interactive Idea:

-Adults hold one end and child hold the other end of the ribbon. Take turns holding one end of the string up high and one end down low to make the snowflake fall along the ribbon. Stand close together and then further apart. Does this change how fast the snowflake falls?
